CAREER OPPORTUNITIES – Sterling, VA

Building Automation Field Support Specialist (Ref #1322-G)

Toyon is seeking an individual to support the implementation and sustainment of specialized building automation systems for government clients in the Washington DC area. Toyon’s project team of engineers and technical specialists is responsible for assuring performance and reliability of environmental control systems. The field support specialist will directly support team members performing control and integration tasks and will provide responsive client support for multiple installed systems.

Job assignments include a range of on-site work, concerning installation, startup/checkout, troubleshooting and optimization of DDC and PLC-based hardware and software. A typical project requires a balance of independent work activities and interaction with senior technical staff. The position offers a path to building additional automation skills and responsibilities.

All candidates must be U.S. citizens. Existing security clearance is desirable. The ideal candidate will also have the following experience, skills, and ambitions:

- Minimum of 5 years work experience in HVAC or electrical systems, and a minimum of 2 years directly working on integration, checkout, testing, and/or field support of DDC and/or PLC-based automation systems
- Understands specifications and design drawings for specialized environmental control applications (data centers, laboratories, clean-rooms)
- Motivated to provide timely response for field support calls, especially to communicate the causes and resolutions to problems impacting site operations
- Works well with others to plan, conduct, and report efforts on a regular basis
- Knowledge of IP-based networks and building automation protocols desirable
- Experience calibrating field measurement devices (pressure, airflow, etc.) desirable
- Experience with Automated Logic, Alerton, Delta, or Loytec controllers and software desirable
- A.S. in electrical, mechanical, or information technology applications, or equivalent training and work experience

U.S. Citizenship Required. Ability to qualify for a US Department of Defense security clearance required.
