CAREER OPPORTUNITIES - Santa Barbara, CA

Embedded Software Engineer (Ref #0818-C)

Toyon Research Corporation is seeking a motivated, detail-oriented engineer to join its embedded software development team. Candidates must have experience with embedded operating systems, such as Linux and VxWorks. Familiarity with the entire embedded design flow, from PCB layout through board bring-up, debugging, verification, as well as device driver development, is desirable. A background in field programmable gate arrays and associated soft and hard processors is also a plus.

Toyon conducts research and development in wireless communications, including software defined radio and sensor networks, as well as video processing. Current embedded video design efforts include analytics, compression, and imaging module design. The position provides an opportunity to work at the forefront of technology in a dynamic, small-group environment. The ideal candidate will have an EE/CE/CS B.S. degree and 5 years of work experience or an M.S. degree and 2 years of work experience.

U.S. Citizenship Required
